OUR MISSION

To provide incessant inspiration in the creation of successful world class presentation solutions

Durleigh

Introduction

The most important signs around a campus are clear, easy to read wayfinding signs so students and staff can find their way around easily. Door signs for specific rooms are essential to assist students when classes or lectures are moved around the campus site and vacant or occupied slider signs can be useful to minimise needless interruptions. For students studying specific projects or interests, clear signs to the library or computer suite will be appreciated.

Most of the education sector would host events for enrolment, awards, fundraising and entertainment; this is when printed flags and banners, roller banner systems and information display systems come into their own. Clear signage minimises stress when navigating a large building giving a user friendly experience. Our Wayfinding and individual door signage can include pictograms and braille and tactile to ensure that blind or partially sighted, disabled or those with special needs are not discriminated against and are able to have a great experience too.

Whatever your requirements or environment we have a solution for you, if we dont our custom builds department can design and manufacture a solution to fulfil your specifications.

The logo for Durleigh, featuring the word "Durleigh" in a bold, blue, sans-serif font. The text is contained within a white rectangular box that is tilted slightly to the right. This box is set against a larger, solid blue rectangular background that also has a slight tilt, creating a layered effect.

Wayfinding Signage

Wayfinding signage is important to inform people where to go. When considering wayfinding signage, you need to be sure to create a comprehensive, clear and consistent communication system through out the building.
