## OUR MISSION

*To provide incessant inspiration in the creation of successful world class presentation solutions*

**Durleigh**

# Introduction

---

Manufacturing is the production of merchandise for use or sale using labour and machines, tools, chemical and biological processing or formulation. The term may refer to a range of human activity from handicraft to high tech.

Durleigh provide manufacturers with an all-inclusive signage package starting with a signage audit to identify all current signage on site. We can provide advice on the location of site traffic control signs, wayfinding signage, PPE equipment boards, KPI Panels, organisation charts and tool shadow boards.

The Custom builds department of Durleigh can assist in the more specialist areas of your factory where downtime costs money. Imagine your health and safety department has to shut down a production line due to a damaged machine guard. Getting a replacement machine guard is of upmost importance but knowing who to call or where to go is your worst nightmare.

Durleighs custom build team are available to come to your factory, access the situation and then get to work designing and manufacturing a high impact replacement machine guard that can be delivered back to your factory door to minimise disruption and production down time.

What is more we take care of all the paper work.

The Durleigh logo is located in the bottom left corner. It consists of the word "Durleigh" in a bold, blue, sans-serif font, set against a white rectangular background. This white background is itself set within a larger blue rectangular frame that is slightly tilted to the right.

# KPI & Shadow Panels

KPI (Key Performance Indicators) and shadow panels are a way to keep workers, within a factory, informed of their progress and making sure areas remain organised so everything is to hand.
